Summary

I started my career as a front-end developer but I love logical thinking and I always look for the hardest problems to solve.

So these days I prefer working as a back-end engineer.

Furthermore information has been vital for a business all the time so I love working in companies which are developing data driven products.

Experience

Full Stack Engineer

Self-employed

Aug 2021 - Present (2 months +)

Full Stack Engineer

PicnicHealth

Dec 2020 - Jul 2021 (8 months)

- Worked on React/Node/Express-based application, validating query string with regex.
